EDUCATION

Asia Pacific University of Technology & Innovation
Bachelor of Science (Hons) in Software Engineering

Kuala Lumpur, Malaysia
Mar 2025 – Present

Asia Pacific University of Technology & Innovation
Diploma in ICT, specialism in Interactive Technology

Kuala Lumpur, Malaysia
Sep 2022 – Feb 2025

EXPERIENCE

Product Engineer

Jan 2026 – Jul 2026

Bundie (DeFi Startup)

Malaysia

- Built the Bundie mobile app, bringing DeFi yield strategies to users on mobile.
- Developed yield automation features to streamline allocation of user funds across DeFi protocols.
- Revamped the web frontend, improving usability and overall user experience.

Software Engineering Intern

Jan 2026 – Apr 2026

Hata (Cryptocurrency Exchange)

Kuala Lumpur, Malaysia

- Developed RESTful APIs in Go and Gin for trading wallet operations (deposits, withdrawals, internal transfers), improving transaction processing efficiency by over 20%.
- Built a Kafka-based push notification system delivering real-time alerts, scaled to 200,000+ users.
- Developed an internal profit reconciliation system for the finance department, improving reconciliation efficiency by over 15%.
- Assisted in prototyping the Hata Mini App, accelerating feature validation and iteration.

PROJECTS

AgentVeins | TypeScript, Node.js, Solana, x402

- Built a spending firewall for AI agents enforcing allowlists, budgets, pinned recipients and a kill switch pre-spend.
- Published @agentveins/core and @agentveins/adaptor-solana to npm, with a zero-dependency policy engine.
- Logged every allowed and blocked payment to a signed, tamper-evident audit log with truncation detection.

Anchor | Go, Gin, PostgreSQL, React, Docker

- Built a full-stack FX and tax tracker in Go and Gin with a React frontend, covering the layer broker apps ignore.
- Implemented a conversion log with per-pair blended average rates, surfacing true returns in home currency, not spot.
- Added dividend tracking with US withholding applied for Malaysian residents, persisted via GORM and PostgreSQL.

ENSPin | TypeScript, Node.js, Ethers.js, IPFS, Docker, Next.js

- Monitored events on ENS resolver smart contracts using TypeScript, Node.js, and Ethers.js.
- Integrated IPFS, Docker, and Next.js for continuous content pinning, reducing ENS content expiration cases by 70% for prototype users.

LEADERSHIP & ACTIVITIES

APU Blockchain & Cryptocurrency Club (APUBCC)

- President (2025 – Present) – Leading a community of 300+ active members and 20+ committees to drive blockchain education and adoption.
- Vice President of External Affairs (2024 – 2025) – Secured USD 5,000+ in sponsorships; obtained a USD 15,000 prize pool for the DEVMatch Hackathon 2025.

ACHIEVEMENTS

- **IOTA Hackathon Malaysia 2025** – 1st Place
- **ETHGlobal Taipei 2025** – Best ENS Infrastructure
- **Encode University Hackathon: Future of Blockchain** – Citrea Track, 2nd Place

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Go, Python, Java, Rust, Solidity, SQL

Frameworks: React.js, Next.js, React Native, Node.js, Gin

Developer Tools: Git, Linux, Docker, GitHub Actions, Kubernetes, GCP, Kafka

Databases: MySQL, PostgreSQL

Spoken Languages: English, Mandarin, Malay
